MAJOR POLICY - Immediate Action (2/3rd vote required)

To be located on page 263 under Adult Education:

CTA Believes:

That Adult Education in K-12 and Community Colleges should be a seamless pathway that articulates between both systems. The structure of the Adult Education system should include collaboration between groups to foster efficiency. Funding for Adult Education must include a dedicated adequate funding source. New funding must be used to restore, maintain and create programs for adults.

CTA Believes:

The purpose of Adult Education is to provide opportunities for adults with low skills to gain education and training to become career or college ready.

CTA Believes:

Creating efficiency in both the K-12 and Community College systems when developing courses must not create a hierarchy that subsumes one under the other.

CTA Believes:

The employees must remain with their current employer.
